

OnSpeed releases new version of UK's most popular web accelerator

Version 4.0 enables OnSpeed to deliver an even faster and more reliable service to all its new and 250,000 existing customers

LONDON, UK – May 25th 2005 – OnSpeed just got faster. OnSpeed today announced the release of OnSpeed Version 4.0 which offers more speed and new features, giving both improved functionality and even better performance.

Version 4.0 offers a 30% faster service than the existing version, whilst offering expanded compatibility and support for increasingly popular internet browsers such as FireFox, Mozilla and Opera. With increased image quality and new functions such as a Privacy Manager to help clear cookies and local web files at the push of a button, compression of IMAP emails and a new toolbar in Internet Explorer for increased ease of use and control, OnSpeed once more proves why it is the best consumer internet accelerator available.

“This new and greatly improved Version 4.0 effectively means a major breakthrough for our customers’ online experience.” says Jamie True, co-founder of OnSpeed. “This latest version offers enhancements to our already award winning service, providing an accelerator which helps Internet users to reach near broadband speeds from dial-up and allows broadband users to vastly improved speeds over their connections”.

All existing OnSpeed customers will be upgraded to Version 4.0 at no extra charge.

OnSpeed Version 4.0 is currently available at www.onspeed.com and at all major retail stores nationwide.

About OnSpeed

OnSpeed is a privately owned technology company that delivers on the need to increase the speed of Internet access by offering a unique compression service. Using a 9 patented compression technology, OnSpeed is the fastest internet acceleration software on the market and instantly enables any PC, Mac and now for the first time Pocket PC user to browse at near broadband speeds. The company’s customers are primarily end consumers and top-tier ISPs, including BT, the UK’s largest Telco with over 20 million fixed lines, DSL and dial-up.
