

ONSPEED
WAKE UP YOUR INTERNET

ONSPEED to be available in all ASDA stores

London, UK – November 7th 2005 - Z GROUP PLC, an established, profitable, marketing led technology services company, announces that through an agreement between Koch Media Ltd, Z GROUP's UK distribution agent and Wal-Mart, the ONSPEED Internet acceleration software service will be supplied to all 282 ASDA stores across the United Kingdom by the beginning of December 2005.

ONSPEED allows users to browse the web, and send and receive emails up to 8 times faster, without the need for additional hardware. It can be used with any Internet connection, anywhere in the world. Using a 9 patented compression technology, ONSPEED is the fastest internet acceleration software on the market and instantly enables any PC or Mac user to browse and use email at near Broadband speeds. The secret behind ONSPEED's success is Content Sensitive Compression (CSC), which is based on a complex series of algorithms that compress and then optimise content by each individual file within an email or web page, providing a dramatic improvement in access speeds

PC World, which already sells the retail version of ONSPEED, will expand its Z GROUP range to include retail versions of NetAway and Onbidder which will be available in all PC World's 135 stores by the end of November 2005.

Jamie True & Jack Bekhor, co founders and Joint Chief Executives commented:

"We are very pleased with the progress made in retail distribution by adding most of the major retail stores in the UK in such a short period of time. We look forward to continue building the Z GROUP brands."

About Z GROUP

Founded in 2002, Z GROUP is a publicly listed technology company which acquires, licences and develops technologies and profitably commercialises them through proven branded marketing techniques. Thus offering cutting edge, easy to use and affordable software for everyone.

The company has currently two existing software businesses

- Net2roam and NetAway; services that allow individuals and SMEs to obtain local dial-up access numbers worldwide at rates below normal international rates
- ONSPEED; fastest internet acceleration software on the market, which instantly enables any PC, Mac and now for the first time Pocket PC user to browse and email at near Broadband speeds by using a 9 patented compression technology.
